SUMMARY

iOS engineer with 5+ years shipping Swift, SwiftUI, and UIKit apps across fintech, edtech, healthcare, and consumer products, with end-to-end ownership from architecture through launch.

SKILLS

Swift, SwiftUI, UIKit, Swift Concurrency, Combine, AVFoundation, MVVM, XCTest, Instruments, Swift Package Manager, Git, Unity, C#, Node.js, Python, JavaScript, GraphQL, Firebase, Convex; AI-assisted development: Claude, Codex

---

EXPERIENCE

Walmart - *iOS Developer* Sep 2026 - Present

- Address accessibility issues in the iOS app through targeted UI fixes.
- Collaborate with backend engineers on schema changes and update client integrations to ensure app fields reflect backend data correctly.

ClassDojo - *iOS Developer* July 2025 - Nov 2025

- Strengthened the WebView-to-iOS audio bridge powering Sparks' interactive early-reading lessons, enabling reliable playback, recording, and sound matching via AVFoundation.
- Profiled and optimized the audio pipeline with Instruments across caching, playback queues, and interruption handling to reduce latency and improve responsiveness.
- Delivered cross-repo fixes across Swift and JavaScript layers and partnered with product, design, and data on onboarding and subscription experiments.

Robinhood - *iOS Developer* Aug 2024 - June 2025

- Built and shipped end-to-end joint brokerage asset transfer flows using Swift/UIKit and Robinhood's design system for a large-scale financial product.
- Added server-driven UI support by building Bonfire Python APIs for dynamic action sheets and time-sensitive banners without requiring an App Store release.
- Modernized ACATS and bonus claw-back flows through promotion experiments and multi-bonus logic refactors while reinforcing testing and release quality.

Acorns - *iOS Developer* July 2022 - Sep 2023

- Improved checking-account onboarding, reducing drop-off and supporting stronger banking adoption conversion.
- Built secure money-movement features and ran A/B tests to identify UX friction across onboarding and transfer flows.

Genentech - *iOS Developer* June 2020 - June 2022

- Rebuilt a reagent-management app in SwiftUI with MVVM for iPad kiosk workflows used by scientists and lab technicians.
- Integrated Bluetooth barcode scanning and real-time backend synchronization for reagent lookup, tracking, and state changes.

PROJECTS

street sk8 - *iOS & Android Game* Aug 2026 - Present

- Built a Unity/C# skateboarding game for iOS and Android with crossplay multiplayer through a custom Node.js relay.
- Reached 2,000+ users in the first two weeks of beta testing on TestFlight and Google Play.

deskpop - *iOS App* Jan 2026 - Present

- Built and launched an App Store app with approximately 900 users, featuring daily trick challenges, video uploads, and community voting.
- Implemented a modular Swift/SwiftUI client, Convex real-time backend, authentication, and Cloudflare R2 video storage; own product iteration, TestFlight feedback, and ongoing App Store releases.

EDUCATION

Loyola University Chicago - Bachelor of Science in Software Engineering (May 2020)
Turing High Achievement Award Recipient - Top graduating S.E. student, selected by faculty (1 of 4 recipients)
